

BIRRUS MATTING SYSTEMS

"a step ahead"

DURAGRIT

BIRRUS DURAGRIT (abrasive grit) is a hardwearing non-slip tread insert developed for internal and external environments where adjacent floor surfaces may prove hazardous. Highly suited for applications on sloping walkways and in industrial situations.

This unique product provides safe footing in high traffic areas exposed to wet or slippery conditions. A well proven design is to install DUAL TREADS (that is 2 x 50mm wide increments) alternatively set into concrete or paving tiles across sloping ramps and walkways.
